

Cycle 7 - cuckoo-modified-api

Sunday, October 9, 2016

1:04 PM

Goals:

1. Create an API, like the ones I've been using
2. Have it be useful - no need to install cuckoo-modified on the local machine to submit rem
3. Integrate CI testing
 - a. Travis-CI
 - b. Mock
4. Support api.py and Django interface
5. Create a package for easy pip install (PyPi.python.org)
6. Create awesome and easy to understand documentation, without much fuss
 - a. <https://keithjjones.github.io/cuckoo-modified-api.github.io/>

notely
