Cycle 7 - cuckoo-modified-api

Sunday, October 9, 2016   1:04 PM

Goals:
1. Create an API, like the ones I've been using
2. Have it be useful - no need to install cuckoo-modified on the local machine to submit remotely
3. Integrate CI testing
   a. Travis-CI
   b. Mock
4. Support api.py and Django interface
5. Create a package for easy pip install (PyPi.python.org)
6. Create awesome and easy to understand documentation, without much fuss
   a. https://keithjjones.github.io/cuckoo-modified-api.github.io/
